

6-6-13

To whom it may concern:

I became acquainted with Frontline Processing a few years ago. At that time my credit card machine went south on me and that provider said it would be 5-7 days before I could get another terminal. That would not work for me. I called Frontline and 35 minutes later I was up and running. awesome.

Recently the State of Montana went to Wright Express. Frontline facilitated this addition in record time
