June 28, 2013

Dear Mike,

It is my great pleasure to recommend Frontline Processing. Frontline Processing has continued to help with the ongoing growth and changes within our communities to help position your business or organization accordingly. I am reminded of their incredibly strong membership support and am so very thankful for their investment in our mission.

**We are able to complete our vital work, such as producing comprehensive research and supporting lenders, because of vendors like you.**

Over the past year with Frontline Processing's help we continue to remain steadfast in our mission of encouraging and supporting business expansion, retention and relocation by being able to continue to rely on Frontline Processing and their merchant service tools.

I have said it before and will continue to say it...our members are our greatest resource and we will continue to provide opportunities for access capital, entrepreneurial driven professional development, and extensive resources to help you, and your organization, thrive in our community. Together we will continue to *help business prosper*

Sincerely,

Stuart R. Leidner  
Executive Director
