Frontline Processing/Mike Peterson

I am writing to recommend Frontline Processing. Our Bank told me that their representative, Mike Peterson, would be out to see me and wanted to look are our process and see if he could help. We get dozens of theses calls weekly from other processors and none could help so I was expecting more of the same. Mike looked at our operation and asked the guys questions and then came and talked to me. He made some suggestions to me that if they were our processor here's what we would do. He didn't talk price, he didn't sell me he simply told me what could be changed and more importantly help our bottom line. We made the conversion that day and I have since added our campground with Mike. Frontline Processing did the changes that Mike said would be made and he has helped our bottom line as well as the support of our local bank. I would suggest you have Mike & Frontline take a look at your operation and see what they can do for you.

Sincerely,

A handwritten signature in black ink, appearing to read "Hank Zomer".
